EXPERIENCE

Software Engineer II

DreamLinked

September 2022 – Present, Ottawa

- Developed the front end for 2 working prototypes of the company's core product, with TypeScript, React, and Redux to create engaging and user-friendly interfaces that received positive feedback from 100 event attendees.
- Collaborated closely with the back-end team to ensure seamless integration with the prototypes, enabling efficient data exchange and smooth user interactions.
- Actively participated in user testing and feedback sessions during events, incorporating insights to iterate on and improve the prototypes, leading to a 20% increase in user satisfaction.
- Contributed to the Agile development process within the startup environment, ensuring rapid iteration and adaptation to changing requirements, enabling the successful delivery of prototypes for live testing.

Web Developer

BlackBerry

January 2022 – December 2022, Ottawa

- Contributed to front-end development within a large team, completing 10+ user interface components with React.
- Assisted in implementing responsive design techniques, improving cross-device compatibility.
- Collaborated with the quality assurance team to identify and resolve 50+ front-end bugs and issues.
- Participated in weekly knowledge-sharing sessions and team workshops, expanding my technical skill set.

Software Developer

Canadian International Sport & Educational Center

March 2021 – December 2021, Ottawa

- Developed a user-friendly web-based platform for event registration and management, streamlining the process.
- Integrated third-party APIs for payment processing and communication, enabling seamless transactions.
- Optimized the center's internal systems by implementing automated data processing and analytics, improving efficiency.
- Collaborated with the IT team to ensure the platform's security and data privacy, implementing industry best practices.

Software Developer I

strelka.tech

April 2019 – November 2020, Moscow

- Developed 3 full-stack web applications using React, Node.js, and Python, contributing to successful project completion.
- Assisted in implementing microservices architecture in 2 projects, supporting the team in reducing development time.
- Participated in Agile development processes, quickly adapting to the methodology.
- Collaborated in designing and developing 5 RESTful APIs, helping to improve application interoperability.

EDUCATION

Diploma in Computer Programming

Algonquin College of Applied Arts and Technology • Ottawa • 2022 • 3.31

Information Technology, Computer Science

Polish-Japanese Academy of Information Technology • Warsaw, Poland • 2021
