SUMMARY

Highly motivated and results-driven Software Engineer with over 2 years of experience in web development, seeking to contribute my technical expertise and problem-solving skills to a dynamic team. Adept at working with multiple programming languages and frameworks, I am committed to delivering top-quality software solutions and user experiences.

SKILLS

- Proficient in React, Three.js and Node.js
- Strong understanding of JavaScript, HTML, CSS, MySQL, and responsive design principles
- Familiar with agile methodologies, version control systems (Git), and project management tools

EXPERIENCE

Software Engineer   **DreamLaunch**   **September 2022 – Present**

- Led application development and architecture of a hackathon event management web application that seamlessly guides users through every step of the event, serving over 100 users
- Implemented complex features such as real-time updates, team collaboration, chat, and multi-stage project management
- Worked with a cross-functional team to gather requirements, prioritize features, and ensure product alignment with business goals
- Utilized React and PHP for efficient front-end and back-end development

Web Developer   **BlackBerry**   **January 2022 – August 2022**

- Resolved functionality issues in a web application by collaborating with architects and QA engineers to identify and implement solutions, resulting in a 20% improvement in system functionality and user satisfaction
- Assisted in the migration and updating of legacy applications to improve performance and user experience
- Utilized React and Adobe Experience Manager (AEM) to develop and maintain web applications

Web Developer   **Canadian International Sport & Educational Center**   **March 2021 – December 2021**

- Developed a custom CRM for managing customers using React and Node.js, improving efficiency in customer management and support by 25%
- Collaborated with cross-functional teams to deliver high-quality code and ensure application performance and scalability
- Developed a server-side rendering feature using Next.js, improving the website's SEO and decreasing page load time by 30%

PROJECTS AND ACHIEVEMENTS

- Designed and developed a personal portfolio website using React, Three.js and Tailwind CSS, showcasing professional work, skills, and experiences
- Developed a full-featured eCommerce platform using React, Node.js, and MySQL, allowing users to browse, search, and purchase products. Implemented secure user authentication and payment processing using Stripe API
- Built a real-time chat application using React, Node.js, and WebSocket, enabling users to communicate in private or group chats. Implemented user authentication, online status tracking, and message persistence using MySQL.

EDUCATION

Ottawa, ON   **Algonquin College**   **January 2021 – December 2022**

- Diploma in Computer Programming, December 2022. GPA: 3.31

Languages

English   French   Spanish   Russian
